ACGR by Race/Ethnicity and State

Figure 2. Adjusted cohort graduation rate (ACGR) for public high school students, by race/ethnicity: 2019-20

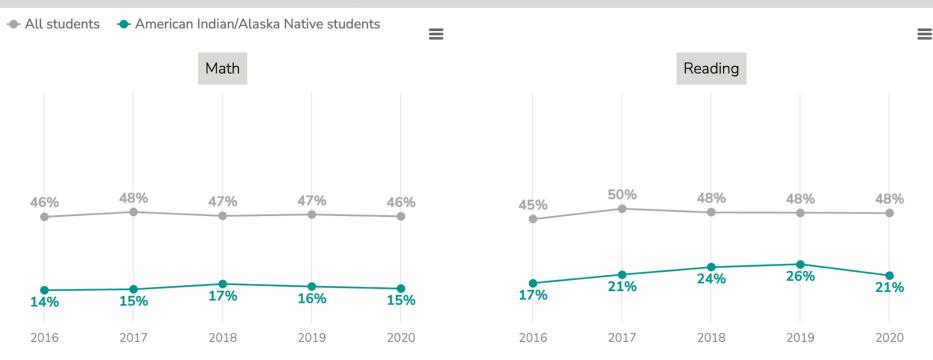

Share of students **graduating high school**

As of the 2018-2019 school year, the Minnesota Department of Education reports some data for American Indian/Alaska Native students using both state and federal definitions. Both definitions are shown in the graduation charts here; for definition details, see the proficiency-related charts at top. Source: Minnesota Department of Education 2016–2022 files.

Source: Minneapolis Federal Reserve

Share of students **showing college readiness** on college entrance exam benchmarks

Students taking the ACT college entrance exam are asked to self-select one racial/ethnic category; thus, the charts above reflect students who identify as American Indian/Alaska Native alone. This aligns with the federal definition noted in the proficiency-related charts at top. Source: ACT Graduating Class Database.

Treaty of Penn with Indians by Benjamin West

Treaty period: 1770's-1870's

Not all treaties were the same:

- all included land
- most recognized sovereignty
- most promised protected reservation land and services including medical care, education, food and clothing

1770's-1832: Independent nations

1832-1870's: Domestic dependents

1871: US HR stopped recognizing individual Tribal nations as independent nations with whom they would negotiate treaties

DOCTRINE OF TRUST RESPONSIBILITY

- US Supreme Court interpretation of a body of nearly 400 treaties between the US government and Indian tribes. The
 Doctrine of Trust Responsibility states that the US government has a responsibility to uphold its end of bargaining with Indian
 tribes by both respecting the autonomy of tribes and providing for their health, education, and well-being.
- In 1977, the Senate report of the American Indian Policy Review Commission expressed the trust obligation as follows:
 - The purpose behind the trust doctrine is and always has been to ensure the survival and welfare of Indian tribes and people. This includes an obligation to provide those services required to protect and enhance tribal lands, resources, and self-government, and also includes those economic and social programs which are necessary to raise the standard of living and social well-being of the Indian people to a level comparable to the non-Indian society.
- Persistence of Doctrine, 1983, US. v. Mitchell, "the undisputed existence of a general trust relationship between the United States and the Indian people" which "has long dominated the government's dealings with Indians." Again in United States v. Navajo Nation, 2003 and United States v. White Mountain Apache Tribe, 2003

1969 REPORT

OF THE

COMMITTEE ON LABOR AND PUBLIC WELFARE UNITED STATES SENATE

MADE BY ITS

SPECIAL SUBCOMMITTEE ON INDIAN EDUCATION

PURSUANT TO

S. Res. 80

(91st Cong., 1st Sess.)

E. SUMMARY OF HISTORICAL FINDINGS

I. Policy Failure

The dominant policy of the Federal Government towards the American Indian has been one of coercive assimilation. The policy has resulted in:

A. The destruction and disorganization of Indian communities and individuals.

B. A desperately severe and self-perpetuating cycle of poverty for most Indians.

C. The growth of a large, ineffective, and self-perpetuating bureaucracy which retards the elimination of Indian poverty.

D. A waste of Federal appropriations.

II. National Attitudes

The coercive assimilation policy has had a strong negative influence on national attitudes. It has resulted in: A. A nation that is massively uninformed and misinformed about

the American Indian, and his past and present. B. Prejudice, racial intolerance, and discrimination towards In-

dians far more widespread and serious than generally recognized.

III. Education Failure The coercive assimilation policy has had disastrous effects on the education of Indian children. It has resulted in:

A. The classroom and the school becoming a kind of battleground where the Indian child attempts to protect his integrity and identity as an individual by defeating the purposes of the school.

B. Schools which fail to understand or adapt to, and in fact often

denigrate, cultural differences.

C. Schools which blame their own failures on the Indian student

and reinforce his defensiveness. D. Schools which fail to recognize the importance and validity of the Indian community. The community and child retaliate by treating

the school as an alien institution. E. A dismal record of absenteesim, dropouts, negative self-image, low achievement, and, ultimately, academic failure for many Indian

children. F. A perpetuation of the cycle of poverty which undermines the

success of all other Federal programs.

IV. Causes of the Policy Failure

The coercive assimilation policy has two primary historical roots: A. A continuous desire to exploit, and expropriate, Indian land and physical resources.

B. A self-righteous intolerance of tribal communities and cultural differences.

CAUSES

Cultural disconnect

Early literacy

Social Determinants of Education

CULTURAL DISCONNECT

Absence of historical truths, devaluation

"Stop Outs" (Rosen)

Individualism v. Community

BOARDING SCHOOLS 1860-78

Commissioner of Indian Affairs, Jefferson Morgan:

"A wild Indian requires a thousand acres to roam over, while an intelligent man will find a comfortable support for his family on a very small tract. When the rising generation of indians have become civilized and have learned how to utilize the land they live on, a vast domain now useless can be thrown open to settlement and become the seat of great farms, happy homes, thriving towns and cities, and vast mining and commercial industries.

Barbarism is costly, wasteful and extravagant. Intelligence promotes thrift and increases prosperity." (Adams, pg 20)

"Kill the Indian and Save the Man"

- Captain Richard Henry Pratt

Stated Purpose of BIA Boarding Schools:

"Assimilate American Indian children into the American culture by placing them in institutions where they are forced to reject their own culture."

Thomas Moore before and after his entrance into the Regina Indian Residential School in Saskatchewan in 1874. Library and Archives Canada / NL-022474

Why Canada is mourning the deaths of hundreds of children

By Holly Honderich BBC News, Washington

(§ 15 July

The discovery in May of the remains of 215 Indigenous children - students of Canada's largest residential school - prompted national outrage and calls for further searches of unmarked graves.

Since then, more unmarked gravesites have been found, providing previews of investigations by Canada's First Nations into the deaths of residential school students.

A rising tally of these graves - more than 1,100 so far - has triggered a national reckoning over Canada's legacy of residential schools. These government-funded boarding schools were part of policy to attempt to assimilate Indigenous children and destroy Indigenous cultures and languages.

SOLUTIONS

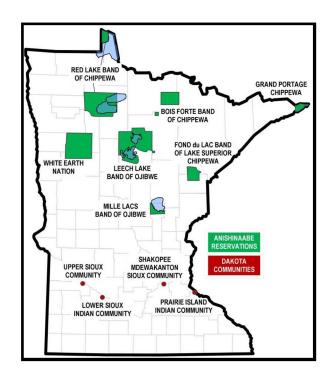

- Culturally informed
- Holistic v. piecemeal
- Family involvement
- Tribal community, governments, and organizational involvement
- Longitudinal student support and transition programs
- American Indian & Alaska Native developed and/or guided

Wisconsin Act 31 1989-91

- Representative Frank Boyle, 89th Assembly District
- Response to racism and ignorance of history, treaty rights and tribal sovereignty during the Walleye Wars of the 1980s
- All public schools are required to provide lessons on the history, sovereignty and culture of the 11 tribes and bands of federally-recognized tribes in Wisconsin

MINNESOTA TRIBAL COMMUNITIES

Features to explore:

- Filtering the list can be done by using the filters above
- Resetting your filters can be done by refreshing the dashboard
- Hovering over an orange shape will show more details (i.e., tooltip)
- Selecting an orange shape on the map will allow you to click on the website URL for the program and get a program

In Summary

- AIAN health disparities are impacted by limited access to care
- Access can be improved by improving educational outcomes at all levels of education and increasing the numbers of AIAN graduating heath professionals
- The causes of AIAN educational disparities are systemic and deeply rooted in this country's history
- Changing AIAN educational outcomes requires solutions that are holistic, longitudinal, and sustained, and led by AIAN people.
