### Original APPLE Taskforce Goals

1. Create collaborative committee including faculty and residents
2. Re-evaluate didactic and rotation curriculum
3. Design and implement three longitudinal learning tracks
4. Address resident wellness as it relates to curriculum
5. Communicate changes efficiently and effectively to all residents and faculty

### Pyramidal Hierarchy of Program Needs

**Collaborative taskforce** focussed on curriculum redesign, track implementation, and resident wellness can ease change-related stress.

### Mission, Vision, and Values

### Track Components by Year

### Take Home Points

1. Change within a residency program is inevitable
2. A collaborative taskforce focused on communicating changes can be helpful in reducing change-related stress
3. Establishing hierarchy of needs is helpful in identifying next steps of program review
4. While focusing on expansion of specific tracks or rotations is exciting, first ensuring strong foundational guiding principles is essential.
