Intense one-week lecture and laboratory experience designed for industry personnel, biomedical engineers, postdoctoral trainees, and graduate students.

Unique features of the course include:
1. Lectures on cardiac anatomy, physiology, associated clinical topics, & cardiac technologies.
2. Laboratory experiences including dissections of human cadavers
3. Live demonstrations, including 12-lead ECG, echocardiography, and more
4. Textbooks, lecture notes, meals daily, and keynote lecture with dinner on Monday evening

Handbook of Cardiac Anatomy, Physiology, and Devices
