

# 2009 Fall Seminar Series

**Mondays at 12:20pm  
B646 Mayo Building**

- |                                  |  |
|----------------------------------|--|
| <b>September 14<sup>th</sup></b> | <i>"Mechanical and Chemical Basis of Cell Growth and Division"</i><br>David Odde, PhD  |
| <b>September 21<sup>st</sup></b> | <i>"T cell Response to Infection"</i><br>Sing Sing Way, MD, PhD  |
| <b>September 28<sup>th</sup></b> | <i>"DNA deamination is a double-edged sword that slays infectious demons but sometimes compromises the host"</i><br>Reuben Harris, PhD |
| <b>October 5<sup>th</sup></b>    | <i>"Fibromyalgia"</i><br>Alice Larson, PhD   |
| <b>October 12<sup>th</sup></b>   | <i>"Designing Therapeutic Protein Nanorings"</i><br>Carston Wagner, PhD  |
| <b>October 19<sup>th</sup></b>   | <i>"Blood, tumors, and stem cells"</i><br>Dan Kaufman, MD, PhD   |
| <b>October 26<sup>th</sup></b>   | <i>"Molecular mechanisms of cell adhesion and migration"</i><br>Yoji Shimizu, PhD  |
| <b>November 2<sup>nd</sup></b>   | <i>"Kaposi's Sarcoma and Viral Oncogenesis"</i><br>Mark Cannon, MD, PhD  |
| <b>November 9<sup>th</sup></b>   | <i>"Maintenance of genome stability in normal and cancer cells"</i><br>Anja-Katrin Bielinsky, Ph.D.                                    |
| <b>November 16<sup>th</sup></b>  | <i>"Pharmacogenomics: Toward personalized Medicine"</i><br>Brian Van Ness, PhD   |
| <b>November 23<sup>rd</sup></b>  | <i>"Muscle diseases, and mechanisms of muscle repair and remodeling"</i><br>Linda McLoon, PhD  |
| <b>November 30<sup>th</sup></b>  | <i>"CD8 T cell memory: issues of quantity, quality, and location"</i><br>David Masopust, PhD   |
