

2010 Fall Seminar Series

**Mondays at 12:20pm
B646 Mayo Building**

- September 13** *"Retroviral Disease, Genetic Engineering, and Carcinogenesis,"*
Reuben Harris, PhD
- September 20** *"T cells and Infection,"*
SingSing Way, MD, PhD
- September 27** *"Immune disorders involving the gastrointestinal tract,"*
Alexander Khouurts, MD
- October 4** *"Insights on the molecular mechanism of opiate addiction,"*
Ping-Yee Law, PhD
- October 11** *"Pharmacogenomics and Personalized Medicine,"*
Brian Van Ness, PhD
- October 18** *"Transcriptional Regulation in Cancer and Development,"*
Vivian Bardwell, PhD
- October 25** *"Time and stress management while in medical school,"*
Marilyn Becker, PhD
- November 1** *"Neuroendocrine physiology, tissue regeneration,"*
William Engeland, PhD
- November 8** *"Regulation of G protein signaling in neurons,"*
Kirill Martemaynov, PhD
- November 15** *"Novel regulators of inflammation and biofilm formation in the lung,"*
Bryan Williams, MD, PhD
- November 22** *"Improving the outcome of bone marrow transplantation,"*
Bruce Blazar, MD
- November 29** *"The roles of heat shock protein 90 in breast cancer,"*
David Potter, MD, PhD
- December 6** *"Regulation of T lymphocyte survival, development and activation by the T cell receptor and by cytokines,"*
Stephen Jameson, PhD
