SUMMARY

CentraCare St. Cloud Hospital Family Medicine Residency prepares family medicine physicians to provide definitive care for the vast majority of patients they will see in their practice—and to become leaders in their future communities.

Our program provides ambulatory training in a vibrant, diverse family medicine clinic, where residents provide care with a team of professionals. Our hospital and maternity care training is at St. Cloud Hospital, the regional medical center for central Minnesota.

We are the only family medicine residency in the St. Cloud metropolitan area, located 1.25 hours northwest of the Twin Cities. Our residents are afforded personalized attention from our various subspecialty preceptors.

What Our Residents Say:

“The support and commitment from everyone involved in the program has far exceeded my expectations.”

“I intend to practice in a smaller community after residency, and St. Cloud has rotations and faculty that will help me achieve that goal.”
CURRICULUM
> Individualized training tailored to resident interests for future practice
> Advanced maternity care and rural experience tracks
> Procedural training opportunities in the hospital, clinic, and simulation center
> Integrated behavioral health
> Opportunities to work with diverse, underserved populations
> Point-of-care ultrasound
