

# DEPARTMENT OF FAMILY MEDICINE AND COMMUNITY HEALTH ST. CLOUD

## SUMMARY

**CentraCare St. Cloud Hospital Family Medicine Residency** prepares family physicians to provide definitive care for the vast majority of patients they will see in their practice—and to become leaders in their future communities.

Ambulatory training is in a vibrant, diverse family medicine clinic, where residents provide care with a team of professionals. Our inpatient and maternity care training is at St. Cloud Hospital, the regional medical center for central Minnesota.

We are the only residency in the St. Cloud metropolitan area, located just over an hour northwest of the Twin Cities. Our residents are afforded personalized attention from our various subspecialty preceptors.

### Program Size

6:6:6

### Community Size

199,671 people as of 2020

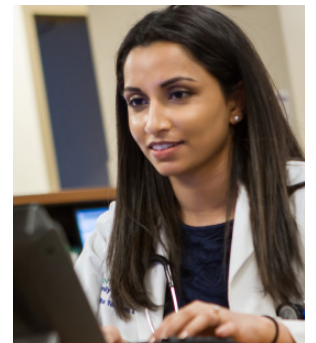

### Location

St. Cloud  
(in Central Minnesota)

### What Our Residents Say:

“The support and commitment from everyone involved in the program has far exceeded my expectations.”

“I intend to practice in a smaller community after residency, and St. Cloud has rotations and faculty that will help me achieve that goal.”
