Tennessen Warning - ScutMonkey

Tennessen Warning Instructions and Verbiage:

The Department of Radiology will be using a software application, ScutMonkey, to gather data from ERAS applications in order to easily sort through applications and build our interview lists.

What this means to you:

- Your biographical information (name, gender, birth place, etc) along with your education/research experience will be uploaded into the online database;
- The computers used to store and analyze your application are not connected to the internet, nor is it used for any other purpose. The application is transmitted to ScutMonkey through a secure server using industrial strength encryption;
- Your personal identifiable information will not be shared with anyone outside of the Department of Radiology education leadership; and
- You are not legally required to have your information uploaded to ScutMonkey. However, only applications uploaded into ScutMonkey will be reviewed.

Mapping to Tennessen Warning MDH Data Practices Requirement:

Introduction:

The Tennessen Warning statement maps back to the MDH Data Practices Manual Requirements

Mapping to Requirements:
