GOVERNMENT AND COMMITTEE SERVICE AND POLICY INVOLVEMENT

Current service & policy involvement:

National Academies of Sciences, Engineering, and Medicine (NASEM), Member, Strategic Council for Research Excellence, Integrity, and Trust --

<https://www.nationalacademies.org/our-work/the-strategic-council-for-research->

[excellence-integrity-and-trust#sectionWebFriendly](#) – The National Academies launched the Strategic Council in 2021 to “serve as a venue for multiple stakeholders to advance collectively the integrity, ethics, resilience, and effectiveness of the research enterprise while at the same time preparing it for tomorrow's challenges.”

National Academies of Sciences, Engineering, and Medicine (NASEM), Member, Committee on Science, Engineering, Medicine, and Public Policy (COSEMPUP) (reappointed for 2nd term) -- <https://www.nationalacademies.org/cosempup/about> --

This is one of the few committees at the National Academies that crosses all three Academies. “In order to ensure that COSEMPUP reflect the most senior and most experienced people in the U.S. research community, COSEMPUP's charter specifies that a majority of its 16 authorized members be elected members of the various academies and that the presidents of the three academies serve as ex-officio members.”

National Institutes of Health (NIH), National Human Genome Research Institute (NHGRI) & National Cancer Institute (NCI), Clinical Sequencing Exploratory Research (CSER) Consortium and Clinical Sequencing Evidence-Generating Consortium (CSER2) (currently Affiliate Member of CSER2 Consortium) --

<https://www.genome.gov/Funded-Programs-Projects/Clinical-Sequencing-Evidence-Generating-Research-CSER2> and <https://cser-consortium.org/> -- I served as a Member of the NIH ELSI Return of Results Consortium, which in 2013 became the Clinical Sequencing Exploratory Research (CSER) Consortium. I am now an Affiliate Member of the Clinical Sequencing Evidence-Generating (CSER2) Consortium. Each consortium has been a highly productive confederation of NIH-funded projects across the country, advancing and coordinating research on the integration of genomic sequencing into clinical care, and conducting research across sites resulting in joint publication.

National Institutes of Health (NIH), National Heart, Lung, and Blood Institute (NHLBI), Trans-Omics for Precision Medicine (TOPMed) Program, External Advisory Panel, appointed by Director of NHLBI -- <https://www.nhlbiwgs.org/> and <https://www.nhlbiwgs.org/EAP> -- “The Trans-Omics for Precision Medicine (TOPMed) program, sponsored by the National Institutes of Health (NIH) National Heart, Lung and Blood Institute (NHLBI), is part of a broader Precision Medicine Initiative, which aims to provide disease treatments tailored to an individual’s unique genes and environment.” “Among the responsibilities of the EAP, foremost is safeguarding the interests and confidentiality of study participants, and ensuring their data use limitations are respected. The EAP is asked to make recommendations, as appropriate, to the NHLBI....”

Minnesota COVID Ethics Collaborative (MCEC), Co-lead --

<https://clinicalaffairs.umn.edu/resources/minnesota-covid-ethics-collaborative> and <https://www.health.state.mn.us/communities/ep/surge/crisis/index.html> -- I co-lead MCEC, a statewide collaborative convened by the “Minnesota Department of Health (MDH), State Health Care Coordination Center (SHCCC), Minnesota Hospital Association (MHA), and the University of Minnesota... to rapidly share expertise and support sound ethical policy to cope with the moral challenges posed by the COVID-19 crisis, such as allocation of scarce medical resources in the event that need surges beyond supply.” MCEC has generated multiple frameworks on the ethical allocation of scarce resources in the COVID-19 pandemic, as adopted by MDH and listed at <https://www.health.state.mn.us/communities/ep/surge/crisis/index.html> and at

<https://www.health.state.mn.us/diseases/coronavirus/hcp/therapeutic.html#vents>.

These include:

- **Allocation of Ventilators & Related Scarce Critical Care Resources During the COVID-19 Pandemic**
(<https://www.health.state.mn.us/communities/ep/surge/crisis/allocation.pdf>)
- **Ethical Framework to Allocate Remdesivir in the COVID-19 Pandemic**
(<https://www.health.state.mn.us/diseases/coronavirus/hcp/remdesivir.pdf>)
- **Hospital Guidance: Making Cardiopulmonary Resuscitation Decisions in the Context of the COVID-19 Pandemic**
(<https://www.health.state.mn.us/communities/ep/surge/crisis/cpr.pdf>)
- **Ethical Framework for Transitions Between Conventional, Contingency, and Crisis Conditions in Pervasive or Catastrophic Public Health Events with Medical Surge Implications**
(https://www.health.state.mn.us/communities/ep/surge/crisis/framework_transitions.pdf)
- **Critical Care Guidance for Contingency and Crisis Conditions**
(<https://www.health.state.mn.us/communities/ep/surge/crisis/clinicalcompanion.pdf>)
- **Contributions to multiple documents on “Therapeutic Options for COVID-19 Patients”**
(<https://www.health.state.mn.us/diseases/coronavirus/hcp/therapeutic.html#vents>)

Observer, Uniform Law Commission (ULC), Health Care Decisions Act, Drafting

Committee (preceded by 2020 membership in the ULC Health Care Decisions Act Study Committee) – This committee is working on revising the Uniform Health Care Decisions Act (UHCDA) (*Uniform Health-Care Decisions Act*, NATIONAL CONFERENCE OF COMMISSIONERS ON UNIFORM STATE LAWS, http://www.uniformlaws.org/shared/docs/health%20care%20decisions/uhcda_final_93.pdf), which was first promulgated by the Uniform Law Commission in 1993.

- Independent Study

Chair, Concentration in Health Law & Bioethics, University of Minnesota Law School: As founding Chair of this Concentration since 2006, I have recruited and coordinated a multidisciplinary faculty from across the University (including the Law School, School of Public Health, and Center for Bioethics) to offer Law students a curriculum in health law and bioethics (<https://www.law.umn.edu/academics/concentrations/health-law-bioethics-concentration>).

Joint Degree Students: From 1999-2012 I served as founding Director of the Joint Degree Program in Law, Health & the Life Sciences. This groundbreaking program approved by the Regents of the University of Minnesota in 1999 recruited, trained, and provided support for many students combining a law degree with a degree in biomedicine, the life sciences, or health care, including the JD/MD, JD/PhD, JD/MPH, JD/MS, and JD/MA.

Graduate student committees: I have served on doctoral and masters' thesis committees for students including, but not limited to the following:

- Jay D. Aronson, PhD (History of Science & Technology) – now Prof. of Science, Technology, and Society, Carnegie Mellon University
- Ashley N. Biser, PhD (Political Science) – now Assoc. Prof. of Politics & Government, Ohio Wesleyan University
- Richard Weinmeyer, JD, MA (Bioethics), MPhil – Senior Research Assoc., American Medical Association (2013-17); doctoral student and researcher, Northwestern University

Research Assistants, Research Associates & Grants Collaborators: I and my projects have employed a large number of students as Research Assistants, both Law and Graduate students. Some former students have continued their collaboration as Research Associates. Many of these students and trainees have collaborated on grant-funded projects, resulting in numerous co-authored publications.

Consortium Grants for Graduate & Professional Students: The Consortium on Law and Values in Health, Environment & the Life Science, which I chair, has awarded funding annually to graduate and professional students at the University of Minnesota to catalyze and help support work on the societal implications of biomedicine and the life sciences. The Consortium has made over 100 awards to students based on proposals submitted in response to an annual Request for Proposals, totaling more than \$700,000 awarded 2000-20. (For more information, see <https://consortium.umn.edu/consortium-research-awards>.)
