

SPRING 2012
Mondays at 12:15pm
B646 Mayo Building

- January 23** *"Increasing neural and behavioral plasticity in adults: lessons from birdsong"*
Teresa Nick, PhD
- January 30** *"The role of fetal and neonatal iron in learning and memory"*
Michael Georgieff, MD
- February 6** *"Dystrophic cardiomyopathy pathogenesis"*
DeWayne Townsend, PhD
- February 13** *"Stem cell self renewal in development, disease and therapy"*
Michael Kyba, PhD
- February 20** *"Staphylococcal beta toxin and biofilms"*
Douglas Ohlendorf, PhD
- March 5** *"Bioengineering lungs"*
Angela Panokaltsis-Mortari, PhD
- March 19** *"Understanding the biology of neurodegeneration"*
Harry Orr, PhD
- March 26** *"Preparing for Step 1"*
Yoji Shimizu, PhD
- April 2** *"Neuroendocrine control of developmental timing, body size and behavior in Drosophila"*
Michael O'Connnor, PhD
- April 9** *"DNA adducts as biomarkers of carcinogen exposure and metabolism"*
Natalia Tretyakova, PhD
- April 16** *"Tumor microenvironment and the formation of progression-associated signalosomes"*
James McCarthy, PhD
